Experience

Full Stack Developer

Yotpo

Mar 2021 - Present (1 year 10 months +)

Subscriptions project:

- taking part in the decisions making process
- planning the technical processes
- taking full ownership of technical aspects

Platform project:

- taking part in the decisions making process
- planning the technical processes
- taking full ownership of technical aspects
- Front-end team lead
- system infrastructure lead

Georgi Dimov · 1st

Scrum Master at KPMG

May 18, 2022. Georgi managed Valentin directly

It's rare to come across to a positive and passionate developer like Valentin. I had the pleasure of working with Valentin for almost an year on a project for Yotpo. He showed outstanding growth as Java and Angular professional. Valentin is a team player and is always committed to the team's success. He switches fast between various technologies and tasks and is the kind of person that will not rest until the task is completed. Valentin will be a valuable asset to any team.

Eyal Kenig · 1st

R&D Group Leader at Yotpo

May 18, 2022. Eyal managed Valentin directly

I worked with Valentin for about 10 months, working together on developing a new product in Yotpo. Valentin is passionate to succeed, to learn & solve problems, and is always seeking how to improve his craftsmanship. He is positive and a great team member, always looking for helping others. Valentin learned the entire stack from scratch, really fast, and was able to produce high quality outputs which helped us reach our goals. It was a pleasure seeing Valentin grow & succeed the way he did.

Kamen Tomov · 1st

Software Engineer

May 13, 2022. Kamen was senior to Valentin but didn't manage Valentin directly

I worked with Valentin on a new project for almost an year in 2021 and we jointly delivered as per the requirements and on time. Valentin is energetic, enthusiastic, and passionate full stack software developer. He is always willing to learn new technologies and to improve his skills. He is able to fully implement the planned work regardless of if they involve developing on the front-end or on the back-end. Most of all Valentin is a valuable team player and is always willing to share his experience with his team-mates.

I recommend Valentin for positions that require software development and/or teaching.

Software Engineer Mentor Part Time

Paysafe Group

Jun 2022 - Aug 2022 (3 months)

Leading a group of Software Engineering Interns. Introduction to the Full Stack Development Concepts:

- Back-end
- Front-end
