Top Skills

Java • TypeScript • JavaScript • HTML • CSS • SQL • Spring Boot • Angular • REST APIs • Microservices

Certifications

Program mingBasics with Java
Java Fundamentals
Java Advanced
Java OOP

Honors-Awards

Google Certified Educator

Summary

Passionate software developer focused on building meaningful digital experiences and robust backend systems. I specialize in Java and modern web technologies, with hands-on experience delivering enterprise applications from concept to production.

I enjoy solving difficult technical challenges, improving systems, and transforming ideas into products that are both scalable and enjoyable to use. Whether working on APIs, frontend interfaces, integrations, or infrastructure, I approach development with creativity, ownership, and a strong attention to detail.

Technology for me is more than work — it’s a constant drive to learn, build, experiment, and improve. I thrive in environments where innovation, teamwork, and ambitious ideas come together.

Technical Skills:

Java • TypeScript • JavaScript • HTML • CSS • SQL • Spring Boot • Angular • NestJS • PostgreSQL • MongoDB • Oracle • MySQL • Redis • Docker • Kafka • Git • GitHub • Maven • Linux • OAuth • Socket.IO • REST APIs • Microservices • OOP • AOP • CI/CD

Experience

Sirma
Software Engineer
March 2023 - Present (3 years 3 months)
Sofia, Sofia City, Bulgaria

Worked on enterprise-grade projects across transport and financial domains, including railway system platforms and banking/investment-related enterprise applications.

Contributed to backend service development, enterprise integrations, distributed system communication, and scalable platform functionality within regulated and high-availability environments.

Notable Project Domains

* Railway and transport systems (Deutsche Bahn)
* Banking and investment platforms (VisualVest)
* Enterprise integrations and backend services

Responsibilities & Contributions

* Developed and maintained backend services using Java and Spring Boot
* Worked on enterprise integrations and communication between distributed systems
* Participated in architecture discussions and technical planning for scalable enterprise platforms
* Collaborated with cross-functional teams to support stable production deployments and long-term maintainability
* Contributed to CI/CD workflows, automated testing, and performance improvements

STY

Software Engineer Mentor

June2022 - Present (4years)

Sofia

Mentored and guided a group of Software Engineering Interns during the Paysafe Bootcamp program, introducing them to core Full Stack Development concepts and modern software engineering practices.

Topics included:
* Backend development
* Frontend development
* Database fundamentals
* Bootstrap and UI basics
* Working with deployment environments
* Version control with Git and collaborative workflows

Supported interns through hands-on learning, technical problem-solving, and real-world development practices while helping them build confidence as developers.

Yotpo

Full Stack Developer

March 2021 - March 2023 (2 years 1 month)
Sofia, Sofia City, Bulgaria

Subscription Project

Worked within a team of 5 engineers on a large-scale subscription platform built around distributed systems and microservice architectures.

Contributed to the development of scheduling and project-management systems built from scratch, supporting internal operations and platform scalability across multiple company services.

Participated in backend development, architecture discussions, technical planning, and long-term platform improvements.

Responsibilities & Contributions

* Developed backend services and APIs within distributed microservice environments
* Contributed to scalable scheduling and workflow systems
* Worked across frontend and backend platform functionality
* Participated in technical decision-making and platform planning
* Contributed to deployment workflows and infrastructure improvements
* Worked with reactive and batch-processing architectures

Platform Project

Worked within a team of 5 engineers on a large enterprise platform focused on distributed systems and scalable integrations with external enterprise services.

Led frontend-related technical initiatives while contributing to backend development, infrastructure planning, and architecture discussions. The

platform supported communication with external systems through middleware and modular integration layers.

Responsibilities & Contributions

* Led frontend-related technical implementation efforts
* Developed integrations with external enterprise systems
* Contributed to middleware and scalable integration architectures
* Worked within distributed microservice environments
* Participated in technical planning and architecture discussions
* Contributed to reverse proxies, service discovery, and API integrations

Next Solutions Bulgaria
Java Software Engineer
December 2020 - March 2021 (4 months)
Sofia, Sofia City, Bulgaria

Worked on enterprise HR and workforce management solutions focused on business processes, employee management, and internal platform functionality. Contributed to both backend and frontend development while participating in technical planning, feature implementation, and system improvements.

The project involved extensive work with Java, Groovy, SQL, and the Grails framework, alongside frontend development using vanilla TypeScript and JavaScript. Worked on maintaining and extending large business-oriented applications, developing new features, improving existing workflows, and supporting scalable enterprise systems.

Technologies & Responsibilities:
* Java & Groovy
* Grails Framework
* SQL & Database Development
* Vanilla TypeScript & JavaScript
* Enterprise Business Applications
* Backend & Frontend Development
* Feature Development & System Improvements
* Technical Planning & Implementation

Codexio
JavaSoftware Engineer

2018 - November 2020 (2 years)
Sofia, Sofia City, Bulgaria

Building Web Applications.

Isomatic Complect Ltd
Microprocessors Technician
September 2016 - May 2017 (9 months)
Plovdiv, Bulgaria

Education

Software University (softuni.bg)

SoftwareEngineer, JavaWebDevelopment · (2018)

Professional School of Electonics
Electrician · (2013 - 2017)

High School P.K.Yavorov

Computer Science · (2005 - 2013)
