Summary

Responsible and committed software developer, with a get-it-done and on-time product spirit. Implementing, testing and delivering complex back-end web applications using variety of programming languages and technologies. Technical proficiencies include:

Programming languages: Java, TypeScript, HTML, CSS, SOAP, Spring Framework, Linux/Unix, Apache Maven, NestJS, Angular

Database: MySQL, Oracle, Redis, MongoDB, PostgreSQL

Procedure languages: Assembly

Tools: IntelliJ IDEA, WebStorm, Spring STS, JUnit, Apache Kafka, OAuth, Socket.IO, WSL, Docker, Git, Heroku, API Gateways(ZUUL), Version Control Platforms(GitLab, GitHub)

Methodologies: Aspect-Oriented-Programming, Object-Orient-Programming.

Also big interests in tech, travel, gaming and cinema.

Experience

Freelance Software Engineer

Self-employed

Mar 2023 - Present (7 months)

What I do:

- Design and develop custom web and mobile applications.
- Solve complex coding challenges with creativity and precision.
- Collaborate with clients to bring their visions to life.
- Ensure top-notch code quality and performance.
- Embrace new technologies to stay at the forefront of the industry.

My goal is to empower businesses and startups by providing top-tier software development services. I thrive on delivering results that exceed expectations and meet the ever-evolving demands of the digital world.

Portfolio: <https://valentin-koparov-potfolio-eapd.onrender.com/>

Full Stack Developer

Yotpo

Mar 2021 - Mar 2023 (2 years 1 month)

Subscriptions project:

- taking part in the decisions making process - planning the technical processes

- taking full ownership of technical aspects Platform project:
- taking part in the decisions making process - planning the technical processes
- taking full ownership of technical aspects
- Front-end team lead
- system infrastructure lead

Software Engineer Mentor

STY

Jun 2022 - Aug 2022 (3 months)

Leading a group of Software Engineering Interns in Paysafe Bootcamp. Introduction to the Full Stack Development Concepts:

- Back-end
- Front-end
- Database Bootstrap
- Working with deployment environments
- Git

Advising on building a standalone project.

Java Software Engineer

Next Solutions Bulgaria

Dec 2020 - Mar 2021 (4 months)

Building and supporting Web Applications.

Java Software Engineer

Codexio

2018 - Nov 2020 (2 years)

Building Web Applications.

Microprocessors Technician

Isomatic Complect Ltd

Sep 2016 - May 2017 (9 months)

Education

Software University (SoftUni)

Software Engineer , Java Web Development

2018 - Present

Professional School of Electronics

Electrician

2013 - 2017

High School P.K.Yavorov

Computer Science
2005 - 2013

Licenses & Certifications

Programming Basics with Java - Software University (SoftUni)

Java Fundamentals - Software University (SoftUni)

Java Advanced - Software University (SoftUni)

Java OOP - Software University (SoftUni)

Skills

Kong API Gateway • REST APIs • WebFlux • Nginx • Node.js • Java • TypeScript • Spring Framework • NestJS • Angular

Honors & Awards

Google Certified Educator - Google

Mar 2018
